Toledo	120 miles	.33
Youngstown	206 miles	.40

THE MATTER OF PRICES

As already announced to the nursery trade, **Berryhill's prices** have been drastically reduced for the Spring of 1932; but **Berryhill's quality** remains the same. **Truck delivery charges** are much lower; and we are better equipped than ever before to give prompt and efficient service.

Boxed in items call special attention to varieties offered at prices that speak for themselves.

Q This price list is for the wholesale trade only. If found in other hands please report at once.

Q Quantities of 5, 25 and 250 will be sold at the 10, 100 and 1000 rate respectively.

Q Our terms are 3% when cash accompanies order, 2% ten days, net thereafter, with interest at 7% after June 1st.

EVERGREEN TREES

All our Evergreens have been twice or more transplanted, and are carefully dug with a ball of earth and burlaped. Our soil is unsurpassed for balling—Berryhill's well known life insurance—heavy, fertile clay loam, containing no sand or gravel.

BERRYHILL FROM THE AIR

Aerial view of Berryhill Nursery from the suburbs of Springfield, flying northeast toward Marion and Cleveland. The main Highway is State Route No. 4—the shortest route between Cleveland and Cincinnati—which is newly improved.

Berryhill's nursery rows cover about 150 of the 700 fertile acres in the beautiful valley of Lagonda Creek, where the owners and their efficient staff of employees live and work. Seven years ago we covered about half this acreage. These attractive nursery rows might be extended to 500 acres or more, but our program ahead is quite definitely against further great expansion, for we are more interested in helping the good Lord create and grow plant life of **high quality** than **great quantity**. One of the chief pleasures experienced at Berryhill is to meet here an increasing number of kindred spirits among nursery men and landscape architects who believe with us that more of "those permanent satisfactions of life not measured by any monetary standard," as Pres. Eliot of Harvard, so well put it, are found in trying to produce the **best** rather than the **most**. And strangely enough, our experience is that it **pays**.

Incidentally, there is usually some research work on at Berryhill, in the use of new plant material, methods and machinery. With the cooperation of the horticultural department of Ohio State University, and the Ohio Edison Co., we are experimenting with propagation of evergreens by graft and cutting in outside frames, underheated electrically, and thermostatically controlled, checking with the usual greenhouse conditions.

You might be interested to see some of the 34 other electrical operations our enterprise employs—from heating our water by newly-discovered and economical electric element, and sterilizing our potting soil, to a machine for electrocuting flies! The Ohio Edison Co. call us their Exhibit A. But it helps keep us out of the red, even in these difficult times. Some of our visitors are also interested in the chief source of our soil-building—the peat beds of Holland ("poultry litter" form) and a herd of 40 beautiful Guernseys. Just bed them with it, and they do the rest—ready for hauling to the nursery rows.

Come and see us!

Cordially yours,

A. G. BOOKWALTER, President.
